

# Application

```
graph BT; WS[Web Server] --> Env[call(env)]; Env --> App[Application]
```

The diagram illustrates a three-tier architecture. At the bottom is a light gray box labeled 'Web Server'. An orange arrow points upwards from the 'Web Server' to a red box in the middle. Inside the red box, on the right, is the text 'call(env)'. On the left of the red box is a blue circle containing the text '@app'. An orange arrow points from 'call(env)' to the '@app' circle. Another orange arrow points upwards from the '@app' circle to a blue box at the top labeled 'Application'.

@app

call(env)

# Web Server
